- Member of UEH's offcial team at the 2024 National Student Olympiad in Informatics (*Link*)

Aspiring .NET Developer intern, final-year Software Engineering student, with strong foundation in C#, ASP.NET, SQL Server, and JavaScript. Seeking to join your team full-time to contribute to web application development, learn best practices, and grow in a professional .NET environment.

EXPERICENCE

FAST SOFTWARE JOINT STOCK COMPANY

Software Engineer Intern   *11/2024-06/2025*

− Developed a full-stack cross-platform social app using .NET MAUI (MVVM), integrated with RESTful APIs built in .NET Minimal API & EF Core.
− Implemented secure user authentication with JWT and real email verification (send confirmation link on registration, password reset).
− Designed and connected a local SQLite mobile database with backend SQL Server via HTTPClient and JSON serialization.
− Enabled user profile management, posting, and interaction modules.

SKILL

.NET MAUI:
− Cross-platform mobile app development using MVVM, SQLite and SQLServer.
C# Programming:
− Solid understanding of OOP, async/await, LINQ

ASP.NET Core:
− Building RESTful Web APIs with Entity Framework Core
HTML, CSS, JavaScript, React (basic):
− Web development fundamentals
Git & GitHub:
− Source control, branching, pull requests, collaboration

PROJECT

SOCIAL APP   *03/2025 - 06/2025*

Customer	Personal Project
Project's description	Social app with user auth, posting, and interaction; backend via .NET Minimal API (*Link*)
Position	Full-stack Developer
Role	Developed UI (MVVM), backend APIs (.NET, EF Core), and integrated via HTTPClient.
